

Moles Be Gone!

Finally in
South Africa!!

RODENATOR®

Goodbye moles

Humane eradication of moles ~ no traps
~ no poison ~ environmentally friendly ~
guaranteed results ~ cost effective

Exit can be
open or closed.

Heavy mixed fuel
settles to the bottom
of the burrow.

Mixed gasses fill
the pest's burrow.

Unsuspecting pest
does not detect the
smell of the gas mix.

Fuel mix is ignited which produces
a massive, underground shockwave
of concussive force, eliminating pest
and collapsing major sections of the
burrow system.
